INTERNET MOBILE AU CAMEROUN

Qui est le moins cher?

I. OUT-OF-PACKAGE MOBILE INTERNET TARIFFS

Out-of-bundle mobile Internet tariffs are tariffs that are charged directly to the subscriber's communications credit when the subscriber's mobile phone is in "mobile data" mode. Furthermore, in line with the various recommendations made by the Board to concession operators to improve the quality of experience of consumers of electronic communications services, they have reduced the automatic debiting of the subscriber's communications credit in the event of data volume exhaustion when in "mobile data" mode.
